

STAY COOL WGM Top

The over roof conservatory awning

weinor

Awnings Patio roofs Glasoasen®

TRIED AND TESTED HEAT AND GLARE PROTECTION

Would you like to enjoy your conservatory in a comfortable environment when the temperature is very high outside? Then you should choose the **reliable sun and glare protection** offered by the new WGM Top from weinor. The over roof shading system ensures the space underneath your conservatory or glass room does not heat up too much. It stops the sun hitting the glass roof so heat build up is not an issue – **make the most of a space that would be otherwise unusable!**

WGM Top is ideal for retro-fitting on any roof

... and of course the weinor Terrazza/Glasoase® or any other veranda/ glass room

... IN ALL CASES

Adapts perfectly

The WGM Top can **be used on almost any patio or conservatory roof, even when retro-fitted.** Regardless of whether it's a weinor Glasoase®, a fully glazed conservatory, wooden pergola or any other veranda – the versatile weinor sun protection is always the right choice. Do you have a large roof? No problem! The WGM Top is also suitable **for large widths up to 6.5 m.**

The WGM Top is for universal use

The awning construction can also be used for conservatories integrated into the house

REALLY WONDERFULLY VERSATILE

Top design

weinor places great importance on an attractive external appearance. As sun protection should complement the conservatory or patio roof with a stylish element that is visually perfectly integrated into the house facade's overall look. That is why WGM Top also excels in terms of design – with its **slimline profiles** and clean lines, **no visible fixings on display**. A huge variety of frame colours and fabrics are available to compliment any surrounding.

Top performance in high winds

The new weinor conservatory awning even cuts a fine figure with **higher wind forces up to class 6** on the Beaufort scale as a result of its high-quality finish and robust tensioning system. The combination with a **sun/wind sensor** guarantees that you also have plenty of shade in strong winds, but your awning retracts in good time if it should get stormy.

The advantage for you: the weinor wind sensor reacts with a time delay and not with every single gust of wind that is over wind force 6. This prevents the awning from retracting too early giving you protection from the sun on your patio for even longer.

In Top shape

The WGM Top is available in the **Stretch** and **OptiStretch** versions that ensure optimum fabric performance and positioning. With the **OptiStretch version**, the fabric is firmly clamped on all four sides. The benefits: extremely taut fabric and no light gap on the sides. The **basic Stretch version** is clamped on two sides and there is a light gap between the fabric and side profile. A strong rope tension system ensures even fabric positioning with both versions.

*Fixed support bracket
top in 4 heights: 80,
120, 150 and 220 mm*

*Adjustable support bracket
top in 3 heights: 120–165,
165–210 and 210–255 mm*

*Adjustable support bracket top for
multi-section units, in 3 heights:
120–165, 165–210 and 210–255 mm*

Always the perfect solution

The height between the roof and awning can be individually adjusted using different support brackets – depending on the technical building requirements.

my collections

High-quality awning fabrics

Breathtakingly beautiful and long-lasting!

momentum, mélange and not crazy. Choose your favourite pattern from the 3 collections. Whether it's timelessly neutral, harmonious or creative trends – we have the right material and matching colour for every taste.

State-of-the-art nanotechnology allows dirt to simply roll off. And the innovative solution dyeing technology guarantees long-lasting colour brilliance.

Quality and comfort

made by weinor

The latest frame colours

At weinor you can select from more than **50 standard colours** and more than **150 other RAL colours**. The powder coating done in our in-house factory guarantees **colour fastness** and a **uniform gloss level**.

Premium quality
made in Germany

Most definitely
an original product

Quiet and consistent operation

The WGM Top **tension system** ensures optimum fabric performance and positioning. It includes, amongst other things, a new flat rope and the tried and tested weinor carriage system. The flat rope is **extremely quiet and durable**, the weinor carriage system features **quiet retraction and extension that is gentle on materials**.

Well protected

The all-round enclosed and robust **awning cassette** keeps the fabric and other component parts well protected from the elements. You can enjoy superb weather protection for many years.

Hand transmitter with display
BiEasy 15M Go! and BiEasy app

homecontrol®

Alternatively, you can also operate every technical element on your patio using io-homecontrol® from **somfy**.

Automatically controlled

WGM Top is fitted as standard with a drive without remote receiver. If you opt for a remote-controlled motor with **weinor BiConnect radio control**, you can really easily operate the sun protection using the **hand transmitter or BiEasy app**. The sun/wind sensor makes the awning extend and retract automatically – regardless of whether you are at home or not.
