Pleated blinds | Plissee

A modern interior

DECOMATIC
pleated blinds as
a part of a modern
interior

Smart details, colours,
unobtrusive look and modern
design – all that make the
DECOMATIC pleated blinds
a perfect match for your
modern interior.

DECOMATIC
pleated blinds satisfy
any needs, however
demanding

Wide range of operating
options and a variety of
different types and shapes
ensure their use for any
window – vertical and swivel/
tilt, sloping, arched, roof
or ceiling windows and
conservatories.

100%
European quality

The DECOMATIC system and
components originating in
Germany guarantee flawless
function, perfect design
and long durability of the
DECOMATIC pleated blinds.

Wide range of operating options

Handgrip

simple, yet stylish and discreet control of pre-tensioned pleated blinds.

Cord

with an integrated cordlock and a cord drive system.

Ball chain

smooth and quiet control using an endless chain.

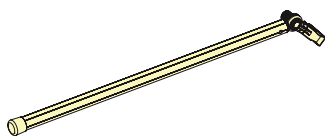

Crank

used for ceiling windows, skylights and winter gardens. Operated using a detachable crank with overload protection.

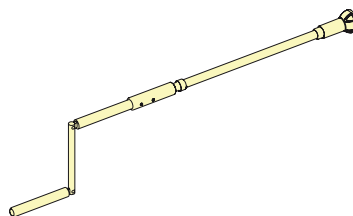

Motor

lowering and lifting with the help of a 24V engine with a wall switch or a remote control.

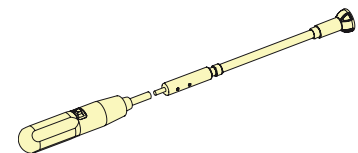

Tilt rod

anodized tilt rod with a joint for tensioned pleated blinds. Adapter for operation using a handle. Length: 1.00 m, 1.50 m or 2.00 m

Crank

used for plafonds
Length: 1.00 m, 1.50 m or 2.00 m

Motor crank

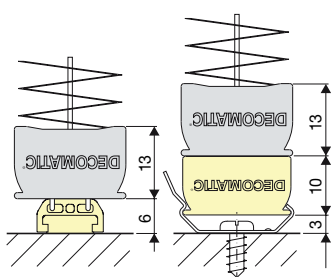

Electric control, used for plafonds. Operated using a crank. Batteries and charging adapter included. Length: 1.00 m, 1.50 m or 2.00 m

Colours and details

Our elegant aluminium profiles are available in three colours: white, silver anodized and bronze. The colours of all visible plastic and metal parts always match. Profiles are available in any colour from the RAL scale. They are coated using the painted powder method.

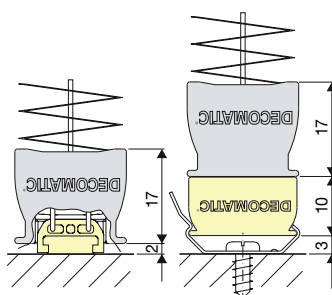

Standard profile 13 mm

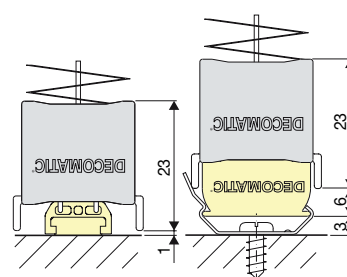

Standard profile – 13 mm (not embedded).
Pleated blind width: up to 70 cm

Reinforced profile 17 mm

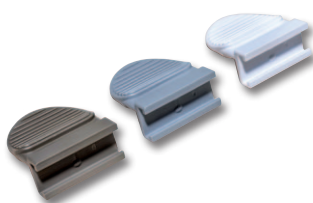

Reinforced profile – 17 mm.
Includes bottom profile to embed the tension bracket.
Pleated blind width: up to 100 cm

Reinforced profile 23 mm

Reinforced profile – 23 mm. Includes a double sided profile to embed the tension bracket.
Pleated blind width: up to 150 cm.

Handgrips

Plastic handgrips for manual control.

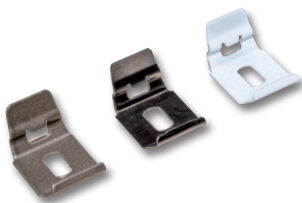

Cord clutch

Plastic cord clutch for manual control.

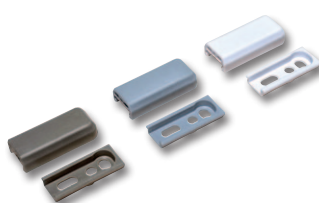

Brackets EXCLUSIVE

Design wall brackets intended for a glazing beam with a depth of less than 1,9 cm.

Clips

Fixing clips intended for standard assembly.

Tension brackets

Tension brackets used to mount pre-tension pleated blinds.

Textiles

The colours of textiles always match.

Atypical shapes

Sloping shape

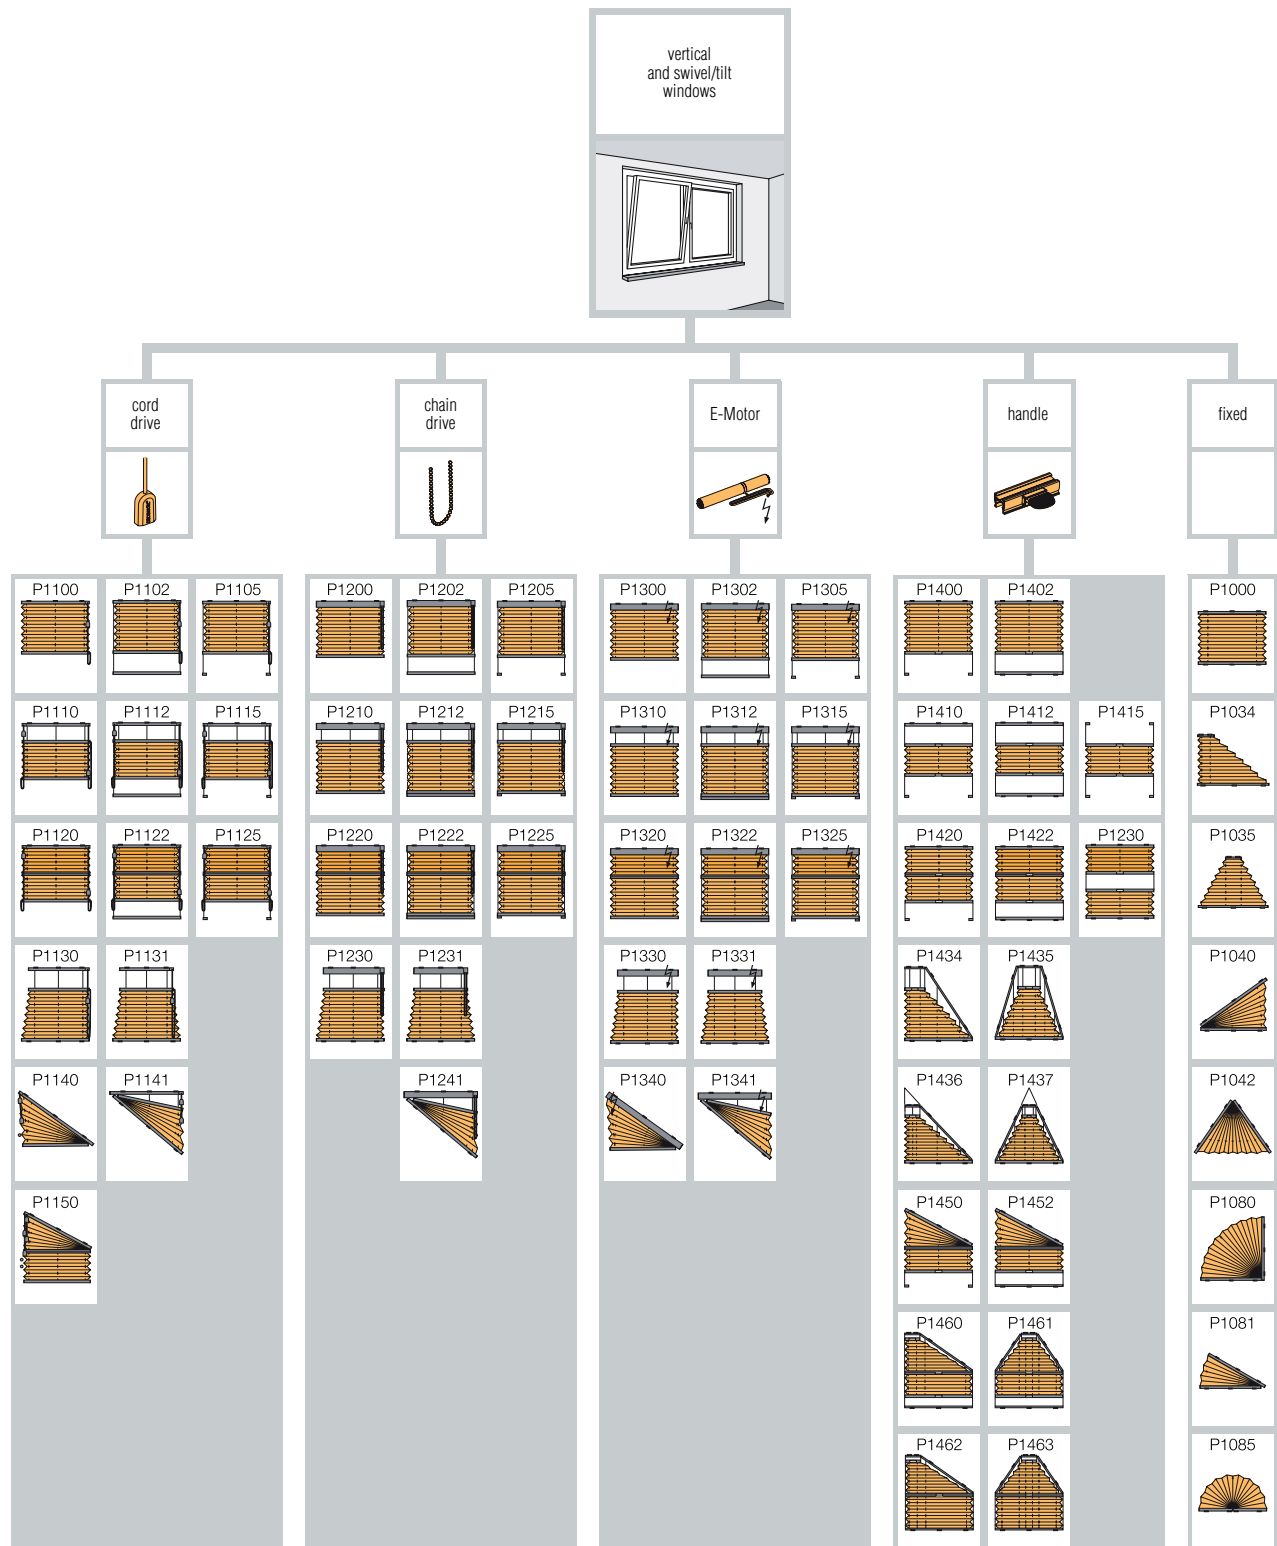

Thanks to the wide variety of the DECOMATIC system it is possible to manufacture pleated blinds for sloping windows. Depending on the type they are operated using a handgrip, cord, chain or motor.

Arched shape

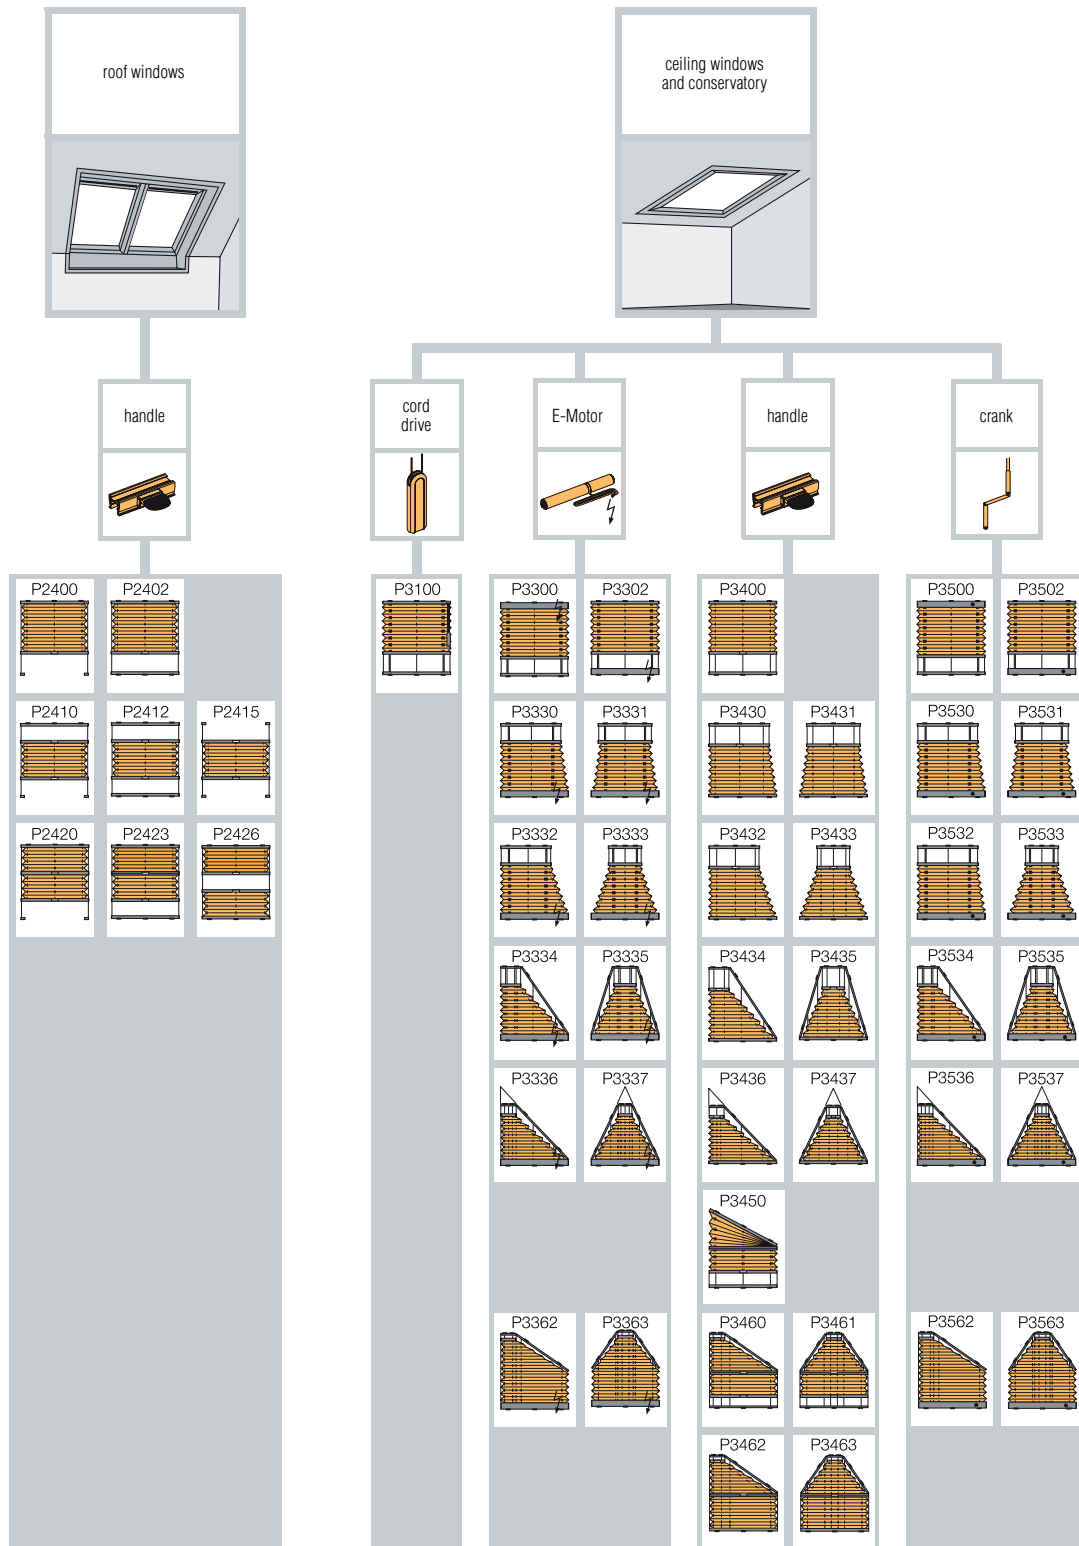

Systra, spol. s r.o. has developed a patented bending system, which allows the manufacture of arched pleated blinds with any radius.
